

The "do not call list" was made for a purpose - to stop unsolicited phone calls from happening. I received a tremendous of calls from telemarketers past 9:00 p.m. I have fought with telemarketers because they don't understand the words "not interested". I have received rude calls from telemarketers because they are annoyed due to the fact "I am not interested". The "do not call" list has reduced the amount of call tremendously. We have at home during night hours peace and all those pesky phones calls have diminished. Please do not cancel the "do not call" list. This is benefiting us "residents" as well as our children as they do not have to hear their angry mothers screaming over the phone because a telemarketer do not understand "do not call back".
